Simply Better Pipetting

Eppendorf Xplorer

People who give 100 % every day deserve the best tool and the best equipment. You work on demanding problems, and important decisions depend on the results of your work. Your standard is extremely high and your performance is professional.

The new **Eppendorf Xplorer** electronic pipette was specially designed for high professional standards to provide optimal support for you in your work, with a new intuitive operating concept and design based on the proven Eppendorf PhysioCare Concept.

These features set new standards for simplicity, precision and reproducibility, which means no more delays due to complicated programming or inflexible processes. Instead, you get precisely adjustable parameters, maximum reproducible results, fatigue-free work and consistent, full control over the pipetting processes.

Work Intuitively

Everything Could Be So Simple – and It Is!

Everything at a glance and with one click

You can easily select all functions with the practical selection dial. The clearly arranged color display of all adjustable parameters means no more getting lost in the submenus! An optional help function can be installed in your language of choice.

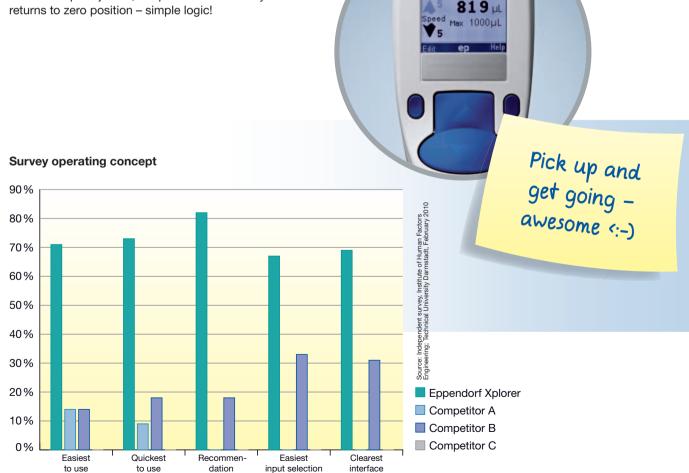

Simple logic

To make pipette operation even more logical, we have developed a unique multi-function rocker for the Eppendorf Xplorer. The switch enables precisest control of liquid aspiration and dispensing. It follows the "Up is up and down is down" principle: Press the rocker up to aspirate liquids and down to dispense liquids. When the tip is ejected, the piston automatically returns to zero position – simple logic!

Everything under control

For slow pipetting, loading gels or dispensing supernatant, a feel for your task is required — and complete control of the piston movement! With the Xplorer, the "Manual pipetting" function and operational rocker make precise and flexible directional control of the piston possible. You have the control. Always and easy!

Manual pipetting

Trouble-Free Dispensing

PhysioCare Concept

Relaxed to the finish line

Eppendorf Xplorer was developed and produced by renowned ergonomics experts according to the high criteria of the PhysioCare Concept.

Eppendorf Xplorer's perfect balance and hand rest guarantee a low-impact position and efficient relaxation periods. The handle and size of the control buttons feature a user-friendly design, regardless of hand size.

Improved view

All information on the Xplorer display is clearly readable, regardless of your hand position or work position. The optimally angled pipette head and high-resolution display with individual brightness setting guarantee a comfortable work environment.

Improved balance of energy

The more energy you need to expend, the quicker your energy reserves are depleted. But because your performance is the most valuable resource, we have significantly reduced the weight and required operating force of the Eppendorf Xplorer.

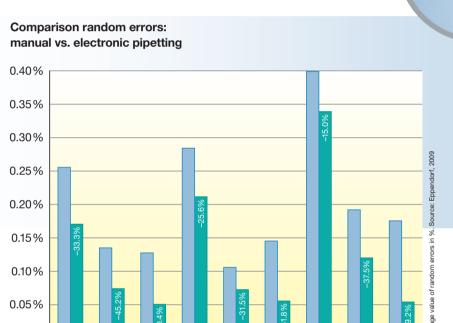

Reliably Reproducible Results

Dispensed Precisely to the Point. And As Often As You Would Like.

When tips are optimally seated

The Eppendorf Xplorer's spring-loaded tip cone provides maximum tightness with minimal attachment force, noticeably reducing the energy required for ejection without compromising tightness. Because the tip always rests in the same position, the reproducibility of your results is heightened.

Reproducible results are essential for your laboratory work! Of course, dispensing results are affected by many factors. For example, by signs of fatigue or the aspiration and dispensing speed of the liquid. With the Eppendorf Xplorer, all relevant factors, e.g., volume, speed, mixing cycles, etc., can now be precisely and reproducibly set. Every day, consistently perfect.

Individual pipetting everywhere

No matter where you are in the world, or which liquid you're using: Eppendorf Xplorer can be individually adjusted to your environment and requirements. For example, to an altitude or specific liquid density. Your unit can also be personally labeled to prevent an accidental exchange of your Xplorer.
